

FONCAST

WI-FI WIRELESS AUDIO RECEIVER

DESCRIPTION

Wi-Fi wireless audio receiver

Upgrade your amplifier with the latest online music streaming services.

Play music from your smartphone, tablet, Windows or Mac via Wi-Fi (2.4 GHz) or RJ-45 network cable.

It has an App for control from smartphones and tablets (iOS and Android), which allows connection with online music services and internet radio, to send the same musical programme to several FONCASTs at the same time (multiroom) or play different musical programmes in each of them. Allows to control the volume of each FONCAST and to customise its name, among other options.

It also incorporates an auxiliary input to connect other audio sources and auxiliary and optical toslink outputs for amplification.

It provides great reliability and sound quality.

It is ideal for domestic and professional audio installations (music bars, waiting rooms, clinics, etc.).
