

POWERBASS-8TN

SUBWOOFER SPEAKER WITH 100 V LINE TRANSFORMER

DESCRIPTION

Subwoofer speaker with 100 V line transformer

Subwoofer with excellent bass response, for sound reinforcement in ambient music.

Improves the bass content of the music, offering deep and powerful bass without distortion.

Unique FONESTAR design, with stylised shapes and compact size. Available in black or white.

Can be installed on the floor or wall and easily goes unnoticed in any space.

Fully protected loudspeaker.

Several options for transformer power selection and low impedance connection that allows it to be adapted to any installation.

It incorporates a low pass filter, which allows its frequency response to be adjusted according to the type of music and features of the premises.

Bass reflex reinforcement, which takes advantage of the rear radiation of the loudspeakers to boost the bass.

Perfect for ambient music applications for the retail sector, bars, cafés, etc .
